

## Metadata Management - MetaDataExpert™

SCDS developed MetaDataExpert™, an Integrated Expert System for Life Cycle Management and Monitoring of any entity that is subject to Multi-D Imaging. Main modules, features and capabilities of MetaDataExpert™:

### MetaDataEditor™

- o Generating a quasi-complete MDB of PE ("Project's Entity") (any site, building, object - vehicle, turbo-machinery, artifacts collection, etc. - or any (size) collection of those entities), subject to 3D imaging
- o "Graphical" DB access to any PE information

### MetaDataMaps™

- o Accurate graphical representation of PE
- o Project 2D/3D Maps via different representations: Google map, custom map, 3D viewer

### Features:

- o Component Structuring
- o Multilevel Access and Security Management
- o Configuration Management
- o Project Management
- o SQL Compatibility
- o Administration
- o Licensing
- o Integrated GUIs for Highly Specialized Applications
- o Intranet-/Enterprise- and Internet-Enabled Deployment
